

About DAB Communications

Founded in 1993 by Paul Raies in Green Ohio, DAB Communications is a family business that has enjoyed steady growth serving Northeast Ohio businesses.

DAB's Mission Statement: Our mission is to provide the highest quality dependable service in a courteous and timely manner to all our customers, regardless.

DAB Communications, We help you communicate!

Cloud IP PBX

Cloud IP PBX provides customers the features of a premised-based PBX without the huge capital expense. Cloud IP PBX is a cost effective solution for a business of any size. With First Communications, you are assured of having a state-of-the-art platform, without the incremental expense.

SD-WAN

Software Defined Wide Area Network (SD-WAN) offers seamless bandwidth optimization within today's distributed enterprise. SD-WAN is application aware and dynamically routes critical applications over a combination of private and public access types to reach multiple locations. Network policies and configurations are hosted on edge devices and controlled from a centralized orchestrator, giving the enterprise access and visibility to the entire network.

Managed Security

First Communications Managed Security offers integrated, high performance protection against today's wide range of threats targeting your applications, data, and users. With a high performance firewall integrated with VPN technology, enabling organization to establish secure communications and data privacy between multiple networks and hosts using IPsec and SSL VPN Protocols.

SIP Trunking

First Communications' SIP Trunking uses a single network connection, to optimize network performance and reliability. We offer many features that provide your business resiliency, disaster recovery, right-sizing and cost saving.
