- Built-in camera for pictures and video applications

Overview

NEC brings you the obvious next step in desktop phone development - the new UT880 desktop telephone. The UT880 re-invents the office phone by integrating the traditional desktop telephone and tablet into one innovative, feature-packed device. When paired with NEC's UNIVERGE SV9100 communications platform, the UT880—revolutionizes your desktop experience.

Solution

The UT880 + the UNIVERGE SV9100 = a Powerful Duo

The UT880 is fully supported on the UNIVERGE SV9100 – the unified communications (UC) solution of choice for small and medium businesses (SMBs). NEC's UT880 Universal Client, a multiline telephone application that emulates an NEC 32-line DESI-less telephone, comes standard in the SV9100's user licensing packages. The interface of the UT880 Universal Client is designed to improve the overall user experience, while remaining intuitive—with no extensive training needed. You can see at-a-glance if you have new voice or instant message notifications, missed calls, meetings and new emails plus it provides access to all of the standard system features.

Additionally, the UT880 enables access to the UC Suite Client – corporate directory, presence, instant messaging, unified messaging and call control – right on your desktop phone.

NEC's Marketplace

To empower your workforce even more, NEC's Marketplace can be conveniently accessed through an icon on the UT880 screen. NEC's Marketplace is our app store offering a full range of business applications to help increase efficiency and streamline access to information. A simple download to the UT880 is all it takes to enrich your business environment. The UT880's dynamic attributes make it a truly unique multi-functional enterprise telephone.

User Experience - Revolutionized

Whether utilizing the emulation of an IP telephone or your UC client, the UT880 gives you a consistent user interface across devices, improving efficiency and revolutionizing the user's experience.
